

Virtual Training Session on Engineering Project Claims – Dams, Tunnels, Bridges and Pipelines (CVT- EPC) – 18th - 19th May, 2021

All engineering structures constitute a load on the earth's crust. Heterogeneity of materials of the earth's crust and the complexity of their arrangement is well documented, and these geologic conditions result into most engineering problems. Humongous risks are involved in major constructions like Dams, Bridges,

Tunnels and erection of any infrastructure. These projects require risk assessment and management approach to suit the specific needs of project financiers. Recently, after the glacier burst at Nanda Devi, colossal losses were suffered at dam site and tunnels. On construction/ erection sites, external factors like natural hazards or fire risks can exacerbate the risk exposure in addition to the risk posed by the construction/ erection activities.

Recognizing this requirement of the market, the College of Insurance has developed a specific course on engineering project insurance claims to understand how to handle claims of such large projects effectively and efficiently.

COI has created '*Virtual Training (CVT) Rooms*' as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

Programme Objective:

- Role of Risk Assessment and Risk Management in large projects at the Proposal Stage
- Types and construction risks of Bridges, Dams, Tunnels, Pipelines
- Best practices to be adopted in the effective handling of Project Claims
- Case studies on Dam /Road /Pipeline /Bridge /Cement Plant construction claims

Participant Profile: The programme is specifically designed for insurance company executives from the underwriting and claims/Audit and Vigilance departments, executives from large and small construction firms, insurance brokers, and loss adjustors.

Duration	Date	Time (IST)	Hours
Two Days	18 th – 19 th May, 2021	10.00 hrs. - 13.00 hrs.	03.00 Hours/Day

Course Fees: Rs.3540/- (Rs.3000/- + 9% CGST + 9% SGST)
