

Virtual Training Session on Marine Cargo Claims and Fraud Management (CVT-MCC&FM) 11th – 12th January, 2021

The past few years have seen a notable increase in cargo claims. The frequency and severity of cargo claims has been increasing, with a combination of large losses and natural catastrophe activity. There has been an increasing risk of large losses due to increasing value accumulations at ports, warehouses and vessels. The fire and explosion recently at the Beirut port and earlier at Tianjin in China along with hurricanes have all brought large cargo losses.

Cargo misappropriation is another growing issue. High value cargoes, like oil and iron ore, can be either stolen or illegally sold. It is a global issue, where risks need to be assessed and monitored carefully to avoid losses. The growing use of technology has its downside too in terms of increase in losses due to cyber breaches. The maritime frauds has also been a growing area of concern for the sector.

COI has created '**Virtual Training (CVT) Rooms**' as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

Programme Objective:

- Understand the trends in Marine Cargo losses and types of losses.
- Learn how various losses occur in different types of cargoes (Liquid and dry).
- Comprehending about claims procedures for better claims management.
- Understand types of Maritime frauds and how to mitigate them.
