

Virtual Training Session on Fire Insurance Underwriting – 7th- 8thSeptember, 2020

Industrial and Manufacturing houses for different commodities and related entities deal with huge assets, machineries and stock. Physical damage to these would be often too costly for the manufacturer to bear. Sustaining businesses by way of insurance protection has been the strategy adopted by multiple governments and industries in their attempts to preserve the wealth of the nation. Losses and damages under fire insurance can arise from a wide range of unforeseen accidents, natural calamities, errors or even malice and be of gigantic proportions, often difficult to assess. For such multiple reasons, underwriting Fire Insurance policies, especially of large risks have always been considered fairly complicated.

The College of Insurance has designed this course to build capacity in the Fire underwriting departments of insurers and broking houses by providing a better degree of clarity in understanding the risk, the exposures and the clauses.

COI has created '**Virtual Training (CVT) Rooms**' as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

Program Objective:

The program is intended to firm up the basics of fire insurance professionals, make them comfortable in underwriting and claims settlement.

- Understanding, assessing and managing the risk in multiple industries
- Understanding the challenges in Fire underwriting in different contexts
- Importance of charging rates commensurate to the risk.
- Learning from challenges and concerns faced during claim settlement

Who should attend?

Junior and middle level officers dealing with fire/ property lines of insurance from insurance companies, brokers, corporate agents, surveyors and corporate customers of the insurance industry.
