

## Virtual Session on Horticulture, Floriculture, Plantations and Vegetable Insurance- 1st Step to enter Rural Landscape (CVT-HFP&VI) – 29<sup>th</sup> January 2022

The vast area and the varied agro-climatic conditions of India ranging from tropical to temperate make it possible to grow almost all the different kinds of Fruits, flowers, plantations and Vegetables, the Spices, the Medicinal Plants. With the advancement of technology the organic farming, the Hydroponics, the tissue cultures, the vertical farming and urban farming are new proven concepts of modern farming. Silviculture has been recognised as the science and art of growth and management of Forest products. Arboriculture

deals with study of trees. Floriculture is the sun rise industry of India and is 100% export oriented. India is the largest producer and exporter of spices and agro based industrial products. There is vast potential for the insurance companies to consider Insurance of this type of Agriculture, which is beyond crops Insurance. Study of agriculture insurance says that the insurance companies are afraid of insuring these plants as either they don't have historical data or experience to develop such products. Which insurance schemes are available and what can be done to explore the potentiality.

COI has created '**Virtual Training (CVT) Rooms**' as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

**Programme Objectives:** The one day session shall look after:
