

Virtual Training Session on Clinical Trial Liability Insurance (CVT-CTLI) – 4th February, 2021

Search for a Covid -19 vaccine has generated interest in the various clinical trials being held to test the vaccine. For better treatment and medication, clinical trials are an important procedure. However, this trial on human beings involve a lot of risk. To get protection from these risks, the organisations conducting the experiment go for an insurance in the form of clinical trial insurance, which provides coverage for researchers and developers in the event of harm caused to a participant of a clinical trial and any compensation required as a result. If a patient is harmed in a trial, malpractice liability would depend on whether there was negligence or deviations from an acceptable standard of care.

COI has created '*Virtual Training (CVT) Rooms*' as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

Programme Objective:

- Understand about the risk management issues of clinical trials
- Learn about underwriting and coverage's of Clinical trial Insurance
- Learn how the claims process of Clinical Trial Policies functions
