(From: 23rd to 24th September, 2019)

Relevance of the Program:-

Enterprise Risk Management (ERM) is important because its success determines the health and life of the business enterprise. If an organization fails to identify risks to its existence, it will be ill prepared to face any risk events.

In the aftermath of the financial crises that hit the Insurance Industry in 2008, the companies have risen to the importance of ERM amidst the regulatory push for maintaining the solvency ratios. Uncertain macroeconomic environment, persisting low interest rates, financial-market volatility, and rising geopolitical instability are some of the eminent risks facing the industry.

Hence it's become imperative for the Industry to bench mark the best practices for ERM systems.

Program Objective:-

- Understand the Compliance and Regulatory risks facing the Insurance Companies
- Learn about importance of Risk reporting and cultivating a Risk Culture
- Find out how to evaluate Risk Appetite and frame strategies
- Using Data Analytics for better Risk Management
