

## On-line sessions on Engineering Project Claims in times of pandemic (CVT – EPC) - 22<sup>nd</sup> – 23<sup>rd</sup> June, 2020

The Industry is facing unprecedented times which require equally dynamic solutions that come only after we understand the impact pandemic has on the ongoing engineering projects.

Some construction projects have been delayed, and some canceled. Further, possible supply chain bottlenecks of equipment and materials could cause project delays in currently funded projects.

The various restrictions put in place by the Governments to control the effects of the virus have triggered shortage of raw material and manpower, disrupted supply chain, further creating handicaps in performing contractual obligations.

COI has created '**Virtual Training (CVT) Rooms**' as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

In this backdrop COI and III present a two day workshop that covers:

- **Role of Risk Management and best practices to be adopted in the Effective Handling of Claims**
- **Case studies on Dam /Road /Pipeline /Bridge /Cement Plant construction claims**
- **ALOP in Project Claims – how to handle start up when the Lockdown opens**
- **Impact of pandemic on the ongoing projects and how to handle the claims - Force majeure and frustration of contracts**

**Who should attend?** All executives working in Insurance Companies /insurance broking companies /surveyors and Engineers working in construction industry /special projects
